AC Variable Speed Drive

0.75kW–250kW / 1HP–350HP

220–480V Single & 3 Phase Input

Powerful Performance
Advanced motor control

PT Series P²

Powerful Performance

World leading control for the latest generation of permanent magnet and standard induction motors

World Leading Motor Control

The PT Series P2 offers the perfect combination of high performance together with ease of use to allow even the most demanding applications to be tackled easily. Designed for fast installation and commissioning, PT Series P2 provides the most cost effective solution for industry.

All PT Series P2 units provide 150% overload for 60 seconds as standard, ensuring each drive is suitable for Heavy Duty applications, whilst the IP55 enclosed versions ensure the drive is tough enough to survive in industrial environments. Extensive I/O and communications interface capabilities ensure the drive can be integrated quickly and efficiently into a wide variety of control systems with the minimum commissioning time, ensuring rapid start up. Powertran simple parameter structure, and carefully selected factory parameter settings ensure that commissioning time is kept to a minimum.

Advanced Motor Control

PT Series P2 has been uniquely developed to allow a wide range of different motor types to be used, with only parameter changes being required. This technology allows the same drive to be used in a wide range of applications, allowing OEMs and end user alike to take advantage of the energy saving provided by using the latest motor technologies.

AC Induction Motors

The majority of AC motors in use today around the world are standard induction motors. These motors are relatively low cost, readily available and provide good performance with long service life. With the ever increasing focus on energy efficiency, motor

manufacturers have refined and improved their designs in recent years.

PT Series P2 has been developed to provide optimum control and maximum efficiency when operating with older motors designs, or newer high efficiency designs.

Operation can be in simple V/F control mode or in High Performance Third Generation Vector Mode, which provides up to 200% torque from zero speed without requiring an encoder.

Permanent Magnet AC Motors

Permanent magnet AC motors provide improved efficiency compared to standard induction motors. Using permanent magnets in the motor construction eliminates the need for any magnetising current, reducing electrical losses. PM motors have been used for many years in high performance applications, however this has always required the use of a feedback device, such as a resolver or encoder. PT Series P2 has been designed to operate with AC PM motors without requiring any feedback device, allowing them to be used for their energy efficiency benefits without incurring extra cost and complexity in applications which do not require position feedback.

IP20

Up to 250kW

IP55

Up to 160kW

IP66

Up to 11kW

150% overload for 60 seconds

At a Glance...

Contactor-style Power Wiring Arrangement

Keyhole Mounts for fast installation

DIN Rail Mount

Modbus
CANopen

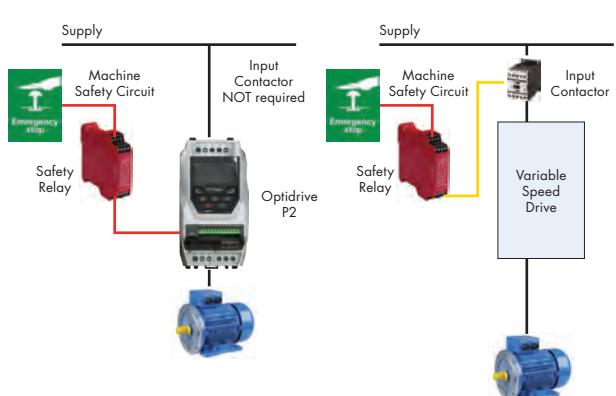

Safe Torque Off (provided as standard)

With

Without

PT Series P2 features a safe torque off function to allow simple integration into machine critical safety circuits.

- ❖ Simple machine design reduces component costs, saves panel space and minimises installation time
- ❖ Faster shut down and reset procedures reduce system maintenance time
- ❖ Better safety standard compared to mechanical solution
- ❖ Better motor connection. Single cable with no interruption.

Meets requirements of IEC 61508 SIL 2, IEC 61800-5-2 Type 2,
IEC 62061 SIL 2 & ISO 13849 PL "e"

PT Series

Applications

High performance, accurate motor control for even the most demanding of applications

Mining & Quarrying

- ❖ Feed conveyers
- ❖ Crushers
- ❖ Cranes

Metals & Processing

- ❖ Grinding
- ❖ Cutting
- ❖ Polishing
- ❖ Drilling
- ❖ Rolling

Rubber & Plastics

- ❖ Extruders
- ❖ Moulding
- ❖ Mixers
- ❖ Winding

Food & Beverage

- ❖ Conveyers
- ❖ Pumps
- ❖ Mixers
- ❖ Palletisers

Cranes

Requirements :

- ❖ High starting torque
- ❖ Smooth motor operation throughout starting and stopping phases
- ❖ Motor holding brake control
- ❖ Avoidance of load droop and sag
- ❖ Regeneration and braking capability during load lowering

PT Series P2 provides :

- ❖ Dedicated Hoist Mode Operation with motor holding brake control algorithm
- ❖ Up to 200% torque from zero speed in vector operation without encoder feedback
- ❖ Multiple Preset Speed or variable speed operation
- ❖ Built in dynamic braking transistor, requires only an external resistor

Compressors

Requirements :

- ❖ Precise regulation of speed to ensure a consistent end product
- ❖ High starting torque demand in many applications
- ❖ Maximum efficiency under all conditions
- ❖ Safe operation to prevent accidents and injuries

PT Series P2 Provides :

- ❖ PM Motor control mode to allows open loop operation with Permanent Magnet motors for maximum efficiency
- ❖ Maximum starting torque with standard AC motors
- ❖ Better than 0.5% speed holding accuracy in Open Loop Vector Operation
- ❖ Dedicated Safe Torque Off input complies with EN62061 SIL Level 2 for safe operation

Winding

Requirements :

- ❖ Precise control of motor torque over a broad speed range
- ❖ Accurate control of material tension under all conditions
- ❖ Open or closed loop control capability, based on tension feedback or winding diameter
- ❖ Web break protection in case of material breakage

PT Series P2 Provides :

- ❖ PID Closed Loop Tension Control with feedback from a load cell or dancer arm
- ❖ Open Loop Vector control provides optimum control of the output torque level
- ❖ Encoder feedback option allows for a very wide speed range, even down to zero speed
- ❖ Safe Torque Off input immediately disables the drive in Emergency conditions

PT Series

Options & Accessories

Installation options, plug-in modules and commissioning tools

Modbus RTU and CANopen on board as standard

For additional communication interfaces or functionality a range of plug-in modules is available:

Fieldbus Interfaces

Profibus DP
OPT-2-PROFB-IN

DeviceNet
OPT-2-DEVNT-IN

Ethernet IP
OPT-2-ETHNT-IN

Modbus TCP
OPT-2-MODIP-IN

Profinet
OPT-2-PFNET-IN

EtherCat
OPT-2-ETCAT-IN

Plug-in Options

Encoder Feedback

OPT-2-ENCOD-IN (5 Volt)
OPT-2-ENCHT-IN (15 – 30 Volt)

Closed loop encoder feedback, compatible with a wide range of incremental encoders

Extended I/O

OPT-2-EXTIO-IN

- ❖ Additional 3 Digital Inputs
- ❖ Additional Relay Output

Extended Relay

OPT-2-CASCD-IN

Additional 3 Relay Outputs :

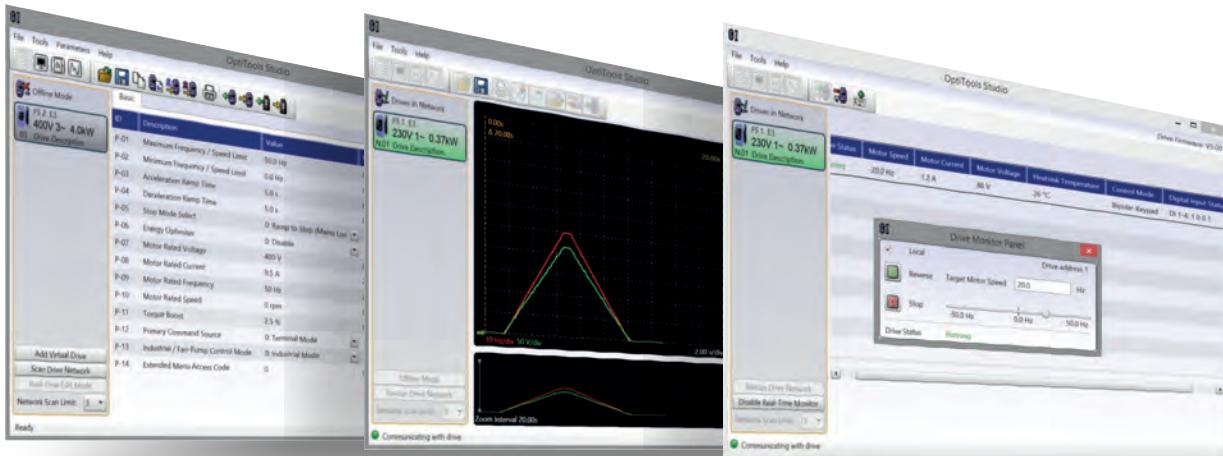

- Relay 3** – Drive Healthy Indication
- Relay 4** – Drive Fault Indication
- Relay 5** – Drive Running Indication

Functions are programmable / adjustable

Installation & Peripheral Options

A range of external EMC Filters, Brake Resistors, Input Chokes and Output Filters are available, to suit all installation requirements

OptiTools Studio

Powerful PC Software

Drive commissioning and parameter backup

- ❖ Real-time parameter editing
- ❖ Drive network communication
- ❖ Parameter upload, download and storage
- ❖ Simple PLC function programming
- ❖ Real-time scope function and data logging
- ❖ Real-time data monitoring

Compatible with :

Windows Vista
Windows 7
Windows 8
Windows 8.1
Windows 10

Optistick Smart

Rapid Commissioning Tool

- ❖ Allows copying, backup and restore of drive parameters
- ❖ Provides Bluetooth interface to a PC running OptiTools Studio or the OptiTools Mobile app on a smartphone
- ❖ Onboard NFC (Near Field Communication) for rapid data transfer

OPT-3-STICK-IN
